Compiladores - Analizador Lexico para el lenguaje C#

Facultad de Ciencias de la Computacion - B.U.A.P - Verano 2004

Profesor: Pedro Bello Lopez.

Alumno: Javier B. Camacho Martinez. Matricula: 990002830

E-mail: <vaLar@unixmexico.org>

Este programa lee un archivo fuente (escrito en C#) y calcula las parejas ordenadas <token, lexema> por medio de un automata finito determinista. Los tokens son guardados en un archivo de texto. (tokens.txt)

Este programa esta diseñado para compilarse en Turbo C de Borland.

Licencia:

Este programa es software libre, por lo tanto se puede distribuir o modificar bajo los terminos de la licencia GNU (General Public License) asi como lo ha publicado la fundacion de software libre.

Si se realiza algun tipo de mejora o cambio significativo a este programa, favor de notificar por e-mail a el autor

Si tiene algun reporte de bugs, comentarios, preguntas o sugerencias envielas por mail a: valar@unixmexico.org
